PROFESSIONAL EXPERIENCE

Tera Bhai Entertainment

Game Developer

Oct 2022 - May 2024

Duration: 1 year 8 months

- Developed innovative game mechanics using C# such as dynamic difficulty adjustment and skill-based progression, increasing player interaction by 40%, as shown in in-game analytics.
- Implemented third-party APIs to enable in-app purchases and ad systems, enhancing revenue streams and user engagement
- Implemented AI pathfinding and behavior systems that increased game realism and received positive user feedback.

TDS Corp

Web Development

Mar 2021 - Oct 2021

(8 months)

- Automated repetitive tasks using Python scripts, improving workflow efficiency by 20%.
- Developed responsive web interfaces using HTML, CSS, and JavaScript that reduced load times by 35%.
- Debugged and resolved critical software issues, reducing system downtime by 45%.

PROJECTS

Rhinoplasty.AI | MVP (Minimal Viable Product)

Persist Ventures

- Developed an AI-powered solution for rhinoplasty planning and evaluation using machine learning models.
- Implemented visualization tools for preoperative simulation and surgical outcome prediction.
- Integrated patient-specific data analysis for personalized treatment recommendations.

Dermatologist.AI | MVP (Minimal Viable Product)

Swiss Corp Inc

- Created an AI application leveraging GLIDE models for dermatological diagnosis and treatment planning.
- Built image recognition system with 90% accuracy for identifying common skin conditions.
- Designed user-friendly interface for medical professionals to analyze and interpret results.

Language Translation Model (Ancient Modilipi Transcripts)

- Developed a hybrid OCR/HOCR system for extracting text from ancient manuscript images.
- Built and trained a custom translation model achieving 85% accuracy on historical text conversion.
- Implemented an intuitive interface for scholars to analyze and translate historical documents.

Recipe Recommendation System | MVP (MinimalViableProduct)

- Created a content-based recommendation engine that analyzes ingredient patterns and user preferences.
- Implemented filtering algorithms resulting in highly relevant recipe suggestions based on available ingredients.
- Designed database structure optimized for fast query response and content retrieval.

An agent with LangGraph and the Gemini API

- A looping chat interface to customers where they can order cafe beverages using natural language
- Nodes to represent the cafe's live menu
- The "back room" ordering system.

Rep.IO | MVP (Minimal Viable Product)

- Developed an exercise tracking application using MediaPipe ML to count repetitions of various exercises.
- Implemented computer vision algorithms to accurately track and evaluate proper form for push-ups, squats, pull-ups, and deadlifts.
- Created intuitive UI for users to monitor progress and receive form correction feedback.

RAG Agent

- Use of Gemini API to create a vector database, retrieve answers to questions from the database and generate a final answer.
- Used Chroma to store embeddings alongside metadata, embed documents and queries, and search your documents.

Education

St. Francis Institute of Technology

Bachelor of Computer Engineering

2022 - Jun 2025

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, C#, JavaScript, C++, PHP, CSS, SQL, php
- **Frameworks & Libraries:** TensorFlow, PyTorch, PowerBI, Unreal Engine, Unity Engine, Unity 3D, Data Visualization, Git, Figma, ComfyUI, Blender 3D, Docker, OCR/HOCR, PowerBI, BigQuery, Tableau
